WCC Seminar

Composites in Construction

This half day seminar provides an insight into the different applications of composites in the construction sector and highlights the potential for Welsh SMEs to explore the various incentives and opportunities to develop their businesses using these materials.

It is organised by the Welsh Composites Centre (WCC) to promote the awareness of composites and share knowledge, skills and best practice in the use of composite materials.

Registration for this event is free but places are limited so please register your interest in attending this seminar with Anke Skrobek on:

A.Skrobek@swansea.ac.uk
Phone: 07934 509414
Fax: 01792 602613
